Grimas Makeup

Grimas water make-up is widely acknowledged amongst face painters as the best water make-up on the market. The most significant factor is the great depth and clarity of the colours. Colours come in pans and are easy to mix and apply. The make-up, once dry is very resistant to rub-off. It can be removed readily with water or cleansing lotion. This makes it ideal for use with children.

Grimas Water Based Makeup

Works just like watercolour paint. Dries and is resistant to rub off. Colours can be mixed. Can be removed easily and no trace of colour will remain. Use cleansing lotion if necessary. Use cake makeup as a base.

Grimas' Cake Makeup (Pancake)

Easy to apply base. Cleanse skin using cleansing lotion.

Moisten makeup sponge and squeeze. Check the correct amount of cake makeup on hand. Apply makeup with sponge.

Mastix/Spirit Gum

Spirit gum is a liquid adhesive which is suitable for use on the body. It is available in a variety of grades to suit a variety of applications. Spirit gum can be used to secure, amongst other things, leotards, wigs, fake facial hair, bald caps, latex accessories and prosthetics, crepe wool, soft putty, polyglitter and polystars. Spirit gum should be removed by dabbing with the appropriate solution and not by rubbing.

Water Soluble Mastix/Spirit Gum

A water soluble liquid adhesive. This product is easily removed with warm water and is suitable for use on children as it does not contain irritants. Water soluble spirit gum loosens when exposed to perspiration. For this reason we do not recommend it for use with soft putty, latex or bald caps, or for use on particularly mobile parts of the face and hands.

Supplied in a bottle with brush.

Spirit Gum Extra

A matte, highly adhesive skin glue. Spirit gum extra can be removed using spirit gum extra remover. This product is effective when exposed to heavy perspiration. It should not be used on the eyes and must not be used as an eyelash adhesive. Supplied in a bottle with a brush.

	£	£ Inc		£ Ex	£ Inc		
Theatrical Makeup			Tooth Enamel				Grimas Eyebrow Plastic Used to block out eyebrows. Make-up can be applied over the top of eyebrow plastic. Apply with the fingernail in the direction of the hair growth. Use spirit gum first if eyebrows are heavy or unruly. Soft Putty Grimas soft putty is a kneadable material which can be modelled and remodelled. To attach soft putty securely, we advise using a spirit gum and mesh technique. For best results, apply the putty in layers. Water-based make-up cannot be used over soft putty. Can be removed with standard make-up remover. Derma wax Grimas derma wax is easy to knead and adheres well to the skin. It can be used to cover scars and make-up can be applied easily over it. We recommend this product above soft putty for close-up work in photography, film and video projects. Can be removed with standard make-up remover. Artificial Blood Blood available in two types. Type A is a light colour, water soluble and can be removed from clothing. Type B is a darker colour and will stain. Blood supplied in bottles with nozzle. Blood capsules can be filled with Type A only. Latex Rubber Milk Used to make positive casts of desired latex body accessories. For best results, set in a plaster mould. Tooth Enamel This product is used to colour teeth and is non-permanent. The range of colours that we supply allows for the production of effects such as blacking out, whitening, nicotine staining and blood staining. Dry teeth with tissue paper. Brush on tooth enamel and allow to dry. Can be removed with any alcohol suitable for human consumption. We suggest gin. Safety Do not use glitter and pearlised cream near eyes.
