

BRODIE & MIDDLETON LTD

Rosco Supersaturated

Water-based brilliant colours in a complete range of theatrical colours. These paints are designed to maintain binder strength when diluted with substantial quantities of water. Rosco Supersaturated Paint is suitable for most scenic surfaces, including muslin, floorcloth, plastic and metal. Dries to a completely matte finish. We have successfully used this product to a dilution of 15:1 as a paint and at 25:1 as a bright translucent wash.

Rosco Off Broadway

Versatile vinyl acrylic paint in a complete range of theatrical colours. This range is extremely popular with scenic professionals in the United States and represents excellent value for money. It is suitable for use on a broad range of surfaces and can be used neat from the tin or 'stretched' by diluting with water.

Rosco Vivid FX

A wide (13 colour) palette of fluorescent paints which perform excellently under daylight and blacklight. These paints are fully intermixable and dry to a completely matte finish. The paint provides remarkably even one-coat coverage. For best results, apply over a white base coat.

Chroma Key

Rosco Chroma Key Paints have been formulated to provide the high luminance values and colour saturation for keying effects.

Colourcoat

Durable water borne acrylic enamel that has excellent interior and exterior durability. Ideal for use on a variety of surfaces including metal, wood, concrete and brick. Maintains high levels of gloss retention and abrasion resistance in interior and exterior applications. Rosco Colourcoat should not be used on unprimed surfaces. The product can also be used to seal and protect scenic paint finishes.

Tough Prime

Tough Prime is a water-based primer which is able to bond to hard-to-prime surfaces such as plastics, metals, foams and light fabrics. Tough Prime can be used to prime muslin, dance floors, vinyl projection screens and even carpet. We have successfully tinted Tough Prime with water-based paints to create even and scuff-resistant floor designs. Use neat for most applications.

Foamcoat

Rosco Foamcoat is a water-based flame retardant coating suitable for a variety of surfaces including foam forms. It can be carved into or sanded smooth to achieve such effects as tree bark, masonry, and rugged terrain. Foamcoat dries to a hard, durable coating that can withstand very abusive handling. It also performs well when used to enhance or texturise floors.

Flexbond

Clear adhesive for general purpose use on porous or non-porous surfaces, including difficult surfaces like Ethafoam.

Clear Acrylic Glaze

Clear glaze designed to extend paint and to act as a top coat. Will mix with any water-based paints including the Super Saturated and Off Broadway ranges.

Cristal Gel

Clear medium made from Styrene resin, which coats almost any surface. Stays clear and flexible. Ideal medium for glitter.

Flamex PA FR

Use this product to render scenic paint fire retardant. It is usual to ensure the intended substrate is flameproofed in its own right. We advise using P50 Paint Additive in addition to, and

not in place of, other Flamex or Flamebar products. PA FR Paint Additive is not suitable for use in any water-borne acrylic enamel paints. Rosco PA FR Paint Additive may be safely added to Rosco's Off Broadway and Supersaturated range. Please test before using with any other type of paint to ensure compatibility.

Glamé

Glamé is woven from a durable, lightweight, self-extinguishing plastic film making it an excellent choice for theatrical, or any entertainment venues.

Slash Curtain

Slashed curtain material for extraordinary dramatic effects. Slit Diffraction material picks up and bounces light. Fabricated entirely of durable self-extinguishing vinyl.

Sparklene

Eleven glitter laminate plastic film colours for exciting effects. Sparklene is pressure sensitive for easy mounting.

Shrink Mirror

Rosco's Silver Shrink Mirror is a lightweight substitute for heavy glass mirror. This metalised plastic laminate is designed to be mounted to a frame and heat shrunk to produce superior optical reflectance.

BRODIE & MIDDLETON LTD

Lighting Gels

Supergel

The Supergel range is composed of selected colours made in a different way from other gels. Supergel film is a tri-extruded polycarbonate filter, i.e. a pigmented layer sandwiched between two layers of clear. This makes it very resistant to minor scratches and wear. It lasts longer in lanterns and scrollers and resists fading very well. Supergel is available in sheets 50cm x 61cm and rolls of 61cm x 7.62m to order. Though we can only stock a limited range in our store, the full selection of more than 125 colours is available to order.

Supergel 50 cm x 61 cm

Sheet 4.67 5.60

E-Colour

A comprehensive range of traditionally prepared, high performance, reliable lighting filters for colour effects, diffusion and reflection. This coated polyester filter uses the cinemoid colour and numbering system used by many lighting designers throughout Europe.

E-Colour+ is also available in half sheets 61 cm x 53 cm and rolls of 122 cm x 7.62m to order. Though we can only stock a limited range in our store, the full selection of more than 280 colours is available to order.
